Jl. Tanjung Sari Barat 4 No 10 Antapani

I am a third-semester Informatics Engineering student at Padjadjaran University (Unpad) with a strong interest in Artificial Intelligence and Data Science. My academic journey is driven by a passion for leveraging technology to solve real-world problems, particularly through the innovative application of AI and data-driven insights.

I actively seek opportunities to develop my skills and knowledge in these fields through hands-on projects, collaborations, and continuous learning. My goal is to contribute to impactful solutions that shape the future of technology.

Feel free to connect with me to discuss opportunities, ideas, or projects related to AI and data science!

Work Experiences

id/x partners

Jan 2025 - Present

Project-Based Virtual Intern

- During my internship, I gained a foundational understanding of becoming a data scientist. I explored real-world case studies and examples through video lessons and articles, which provided a step-by-step approach to solving client challenges. This process included understanding problems from a business perspective and implementing solutions based on data analysis results.

Dec 2024 - Present

Bootcamp

- During the data science bootcamp, I acquired fundamental knowledge and skills necessary to become a data scientist. The program emphasized hands-on learning through real-world case studies and practical examples. It provided a structured, step-by-step approach, from analyzing business problems to applying data analysis techniques and delivering actionable solutions.

Education Level

Universitas Padjadjaran - Jatinangor
